

novaPDF - Editor's Pick

"I have given this listing [novaPDF] an Editor's Pick something I rarely do :). Good work!" *Jim McMahon, MajorGeeks.com*

novaPDF is a PDF creator for Windows that allows you to easily create professional quality documents in industry-standard PDF file format.

Using novaPDF, everyone from novice users to professionals, can instantly create high-quality PDF files, by simply selecting the "Print" command from virtually any application.

With one click you can save your Microsoft Excel, Word or PowerPoint documents or perhaps your emails and favorite websites, into easy to share PDF files.

This PDF creator gives you the ability to fully make use of all its advanced features: PDF resolution, PDF information, compression, security, profiles and more. It is compatible with any PDF viewer/editor not to mention the widely known Adobe Acrobat Reader.

This version is free, however it leaves a "created with" notice at the bottom of the PDF file. You may buy the product for \$19.95 and that notice would be removed.
